MAKES STRONGER CONNECTIONS
The KODI-KLIP® rigidly grips saddle joints, dramatically reducing wracking and eliminating unwanted motion. Its patented four-point grip gives you more consistent and stable connections which makes KODI KLIP® perfect for site-pour, precast, pre-stressed, and tilt-up concrete applications.

EASILY LEARNED
The KODI KLIP® System is easy-to-use and can be mastered in 10-minutes or less. Spend less time teaching workers how to tie, cut, and loop wire, and use unskilled labor to make rebar connections while deploying skilled labor to where it’s needed most.

SAVES TIME
Move from job to job quicker by making connections faster with the KODI KLIP® System. The lightweight, high-powered KLIPPER GUN attaches KLIPS in milliseconds, enabling you to be more competitive when bidding and to complete jobs on budget.

SAVES MONEY
Spend less money hiring and training new rod workers to replace those injured on the job, and cut costs by avoiding more skilled labor to weld connections and more expensive rebar grades. Lower costs that erode job profitability and make it harder to compete — like Workers’ Comp premiums.

PROMOTES HEALTH & SAFETY
Protect your rod workers — equip them with a System that is the safest and fastest in the Industry. Prevent wrist fatigue and cuts from tying wire, eliminate burns and flash injuries from welding, and reduce back injuries from bending. Watch accident rates drop, morale improve, and productivity soar!

MAKES STRONGER CONNECTIONS
The KODI-KLIP® rigidly grips saddle joints, dramatically reducing wracking and eliminating unwanted motion. Its patented four-point grip gives you more consistent and stable connections which makes KODI KLIP® perfect for site-pour, precast, pre-stressed, and tilt-up concrete applications.

FASTER & SAFER.
THAT’S THE KODI KLIP SYSTEM.

WHY TIE WHEN YOU CAN KLIP?

NATION’S LARGEST INVENTORY!
A GREEN SOLUTION
K-KLIPS are molded from recycled polycarbonate resin, a type of thermoplastic known for its high impact strength and heat resistance, so K-KLIPS won’t crack, break, or deform.

NON-CORROSIVE
K-KLIPS can’t rust, won’t degrade, and won’t scratch or damage epoxy coated rebar or fiberglass reinforcing rods. K-KLIPS are ideal for marine or harsh applications because they don’t corrode or abrade.

VERSATILE
K-KLIPS firmly grip any cross, parallel, or vertical rebar connections, work on form spacers, cage assemblies, and high density mats – which can be fastened directly on the ground.

FOUR-POINT GRIP
K-KLIPS provide uniform holding strength at every connection point to eliminate unwanted motion and produce stronger grids. Unlike tie wire, the K-KLIPS provide a four-point grip that guarantees a tight, perfect connection every time!

EFFORTLESS APPLICATION
K-KLIPS snap into position in milliseconds, and then rigidly grip the rebar and hold the configuration motionless with just a pull of the KLIPPER GUN trigger.

EASY-TO-IDENTIFY
K-KLIPS are brightly color-coded by size, making them easy to distinguish and inspect.
USER FRIENDLY
The KLIPPER GUN is compact, lightweight, and ergonomically designed to reduce worker injury and fatigue.

ENERGY EFFICIENT
The KLIPPER GUN runs on compressed air from a bottle, tank, small compressor, or a Plant’s air supply, providing 70 to 110 PSI / 4.5 to 7.6 Bar and as little as 3 CFM / 85 LPM. Ideal PSI / Bar is based on application.

<table>

</tr>
</tbody>
</table>

QUICK LOADING
The KLIPPER GUN takes less than 10-minutes to learn how to use, and the simple push ‘til-locked, magazine-fed K-KLIP Strips are fast and easy to load or unload.

TOOL REPAIRS
The KLIPPER GUN is backed by a 90-day warranty against defects in workmanship and materials. When the Tool does need repair, the work is performed by AIRMATIC’s Trained and Certified Mechanics. Airmatic, the company that wrote the manual on how to use and service the Kodi System!

KORNER KLIPS
KODI KLIP® Korner Klips provide for easier, faster, 3-way corner strengthening. They eliminate wracked, twisted, or out-of-alignment cages and baskets by rigidly enclosing corners with less rebar bending, no welding, and no double wire tying.
CONSTRUCTION INDUSTRY
The KODI KLIP® System is the revolutionary new solution to the century-old problem of fastening rebar. The KODI KLIP® no-wire, automated, rebar fastening system works on any construction site, and is ideal for high-density mats in bridges, roads, and slabs. The K-KLIPS’ secure, four-way grip holds tight, eliminating wracking and streamlining work flow. Finally workers get a tool that enables them to fasten rebar tighter, faster and with fewer injuries, thereby lowering costs and increasing productivity and profit.

PRE-CAST CONCRETE INDUSTRY
The KODI KLIP® System gives you a faster, safer, and better way to make rebar connections. Instead of time-consuming wire ties or expensive welds, the KODI KLIP® System will make the majority of the connections in any pre-cast or pre-stressed production process. The K-KLIPS work great on both horizontal and vertical applications, as well as curved, round, and cage work. Cages maintain their shape when free standing, eliminating the need for diagonal support bars and excessive wheel spacers.

CAST IN PLACE
BRIDGE CONSTRUCTION
A Tennessee bridge contractor used the Yellow 626 K-KLIP to tie #6 x #6 rebar in a project converting a bridge from one to two lanes. Workers immediately noticed how much easier and faster the job went – up to 5X faster than using manual tie wire.
Kodi Klip® Klipper Guns

**KTA-3 Klipper Gun**
Klipper Gun for #3 to #3, 6mm to 10mm, 8mm to 10mm, and 10mm to 10mm Rebar

**KTA-4 Klipper Gun**
Klipper Gun for #3 to #4, #4 to #4, 6mm to 12mm, 8mm to 12mm, 10mm to 12mm, and 12mm to 12mm Rebar

**KTA-5 Klipper Gun**
Klipper Gun for #3 to #5, #4 to #5, #5 to #5, 8mm to 10mm, 10mm to 16mm, 12mm to 16mm, and 16mm to 16mm Rebar

**KTA-6 Klipper Gun**
Klipper Gun for #3 to #6, #4 to #6, #5 to #6, #6 to #6, 10mm to 20mm, 16mm to 20mm, and 20mm to 20mm Rebar

Kodi Klip® Klapper Guns

**KTA-3 Klipper Gun**
Klipper Gun for #3 to #3, 6mm to 10mm, 8mm to 10mm, and 10mm to 10mm Rebar

**KTA-4 Klipper Gun**
Klipper Gun for #3 to #4, #4 to #4, 6mm to 12mm, 8mm to 12mm, 10mm to 12mm, and 12mm to 12mm Rebar

**KTA-5 Klipper Gun**
Klipper Gun for #3 to #5, #4 to #5, #5 to #5, 8mm to 10mm, 10mm to 16mm, 12mm to 16mm, and 16mm to 16mm Rebar

**KTA-6 Klipper Gun**
Klipper Gun for #3 to #6, #4 to #6, #5 to #6, #6 to #6, 10mm to 20mm, 16mm to 20mm, and 20mm to 20mm Rebar

CUSTOMER TESTIMONIALS

I am very impressed with the simplicity and efficiency of the Klip in making rebar connections in both footings and grids for concrete slabs. I have used the Klips in all of my projects since being introduced to them last year, and intend to use them in the future. Congratulations on a great innovative product.

- President, Sun Ray Homes

I just wanted to thank you for showing me your KODI KLIP® System. I started a job that had over 600 columns for the VW Assembly plant in Tennessee...when I started using the KODI KLIP®, I was able to go down to 2 people. Those 2 people were able to keep up with production and even able to get a day to 2 days ahead. I will continue using the KODI KLIP® on everything that I can.

- Moe Bertelsmann, Mid South Prestress

We chose KODI KLIP® for the reconstruction of an aircraft parking apron at the Coolidge Municipal Airport in Arizona. New concrete was 3000 PSI, 6” thick, reinforced PCCP using size 57 rock and placed at a 3” slump. All new pavement was reinforced in both directions with #4 bar, spaced at 12” centers for a total of 33,000 connections. With the KODI KLIP® System, the job was completed in just one day — three days less than anticipated. Including the cost of the Klips, rebar clipping and placement, the Project came in 26% under budget.

- Project Manager, DBA Construction Inc

“THE OFFICIAL TOOL OF THE TRADE”

- International Association of Bridge, Structural, Ornamental, and Reinforcing Iron Workers

GO PORTABLE WITH YOUR KODI KLIP® SYSTEM

TURANAIR® T-FORCE™ WORK BOTTLE™ SYSTEM
A completely portable, environmentally friendly, high-pressure (4500 PSI) compressed air energy supply stored in safe, lightweight, carbon fiber wrapped bottles to power the KODI KLIP® KLIPPER GUN.

T-FORCE™ 114 WORK BOTTLE™ System

KOMPTEC® KT 90 High-Pressure Compressor

KOMPTEC® KT 90 HIGH PRESSURE PORTABLE COMPRESSOR
A portable, lightweight, 3-stage compressor for fast, reliable service in applications requiring compressed air storage bottles and tanks including such as the TURANAIR® WORK BOTTLE™ System.
Fastening rebar with wire ties is an expensive process that can injure workers, create construction bottlenecks and increase maintenance costs, while still producing unstable and inconsistent connections. The innovative KODI KLIP® Rebar Fastening System eliminates these problems. The KODI KLIP® System utilizes a magazine-fed, lightweight, air operated KLIPPER GUN to shoot molded, recycled, polycarbonate resin KLIPS onto rebar connection points. The K-KLIPS provide a secure, four-way grip which won’t damage rebar, corrode, or loosen under load. The System design saves time and effort by enabling the work to be done directly on the surface it is placed on, eliminating the need for lifting and propping-up the rebar while fastening it. The robust K-KLIPS produce far more rigid connections than traditional methods, enabling assembled units to be built and handled safely. The KODI KLIP® System is ideal for site-pour, precast, pre-stressed, and tilt-up concrete applications. The K-KLIPS are used on radiant heating tubes, FRP or epoxy-coated rebar, on flat, curved or cage assemblies, and on high-density mats in bridges, road work or slabs.
